PROFILE

Full Stack Software Engineer building production SaaS platforms, ERP systems, and enterprise web applications for clients in Europe and Latin America. Specialized in Laravel, Vue, Nuxt, TypeScript, and Docker, with hands-on ownership across architecture, REST APIs, multi-tenancy, testing, CI/CD, infrastructure, deployment, and long-term product evolution. Experienced applying AI-assisted development workflows to accelerate delivery while maintaining code quality and technical control.

TECHNICAL SKILLS

Languages	PHP, TypeScript, JavaScript, SQL
Frontend	Vue 3, Nuxt 4, Pinia, Tailwind CSS, HTML5, CSS3
Backend	Laravel 12, REST APIs, Sanctum, OpenAPI, Zod, Orval, Redis, queues, WebSockets
Data	MySQL, MariaDB, database design, migrations, multi-tenant data isolation
DevOps	Docker, Linux, Git, GitHub Actions, CI/CD, Nginx, Plesk, VPS deployments
Testing	Playwright, Pest, Vitest, end-to-end testing, code review
Platforms	WordPress, HivePress, Divi, Elementor, Mercado Pago, Stripe
AI	Cursor, OpenAI, Claude, LLM integration, AI-assisted software development

PROFESSIONAL EXPERIENCE

Freelance Full Stack Software Engineer

2023-Present

- Design, build, deploy, and maintain business-critical software for clients across Europe and Latin America, owning backend, frontend, infrastructure, integrations, and production support.
- Translate operational requirements into scalable web products, technical architectures, deployment workflows, and maintainable codebases.

Lead Full Stack Software Engineer - Cosmos ERP, Spain

Current flagship project

- Architected and developed a multi-tenant ERP using Laravel 12, Nuxt 4, Vue 3, TypeScript, MySQL, Redis, and Docker.
- Built modules for invoicing, purchasing, warehouses, inventory, customers, income, subscriptions, user management, storage, and point-of-sale operations.
- Implemented Spanish tax-compliance workflows, including VeriFactu and SII integration requirements.
- Established end-to-end type safety with OpenAPI, Orval, and Zod, and strengthened quality through Playwright, Pest, Vitest, staging, and code review workflows.
- Refactored critical backend modules using SOLID and single-responsibility principles to improve maintainability, testability, and product evolution.
- Managed CI/CD, Docker environments, Linux infrastructure, Nginx/Plesk deployments, monitoring, incident resolution, and production maintenance.

Lead Full Stack Software Engineer - Ticador SaaS

SaaS workforce platform

- Built a multi-tenant workforce management platform with tenant-specific subdomains, isolated environments, authentication, authorization, and REST APIs.
- Automated tenant provisioning, deployments, database setup, scheduled updates, reporting, and customer onboarding workflows.
- Integrated Stripe subscriptions, real-time notifications, device approval, and PDF/Excel reporting with scheduled delivery.

Full Stack Engineer - Enterprise WordPress Projects

Hospitality, training, and business platforms

- Developed custom plugins, API integrations, reservation workflows, marketplace logic, payment gateways, forms, reporting, and role-based experiences.
- Customized WordPress, HivePress, RentalHive, Divi, and Elementor solutions while improving performance, technical SEO, email delivery, and maintainability.
